

accounting

Clients select BSL to implement their accounting functions so that their financial resources can be diverted to income-generating processes rather than support functions.

Our accountants can either take charge of the implementation from our offices or they can work on-site. In both scenarios your company is guaranteed cost savings in comparison to engaging its own full-time accounting personnel.

We guarantee confidentiality, operating efficiency, reduced costs alongside professional expertise and advice to all clients who look to us to:

- Provide routine accounting services
- Provide computerised accounting via various commercial accounting software titles
- Advise and assist on computerised bookkeeping
- Review and install computerised accounting systems
- Compile quarterly GST submissions
- Liaise with auditors until the audited accounts are finalised
- Review management accounts through the provision of detailed analyses and reports, highlight areas of inconsistency and prepare recommendations for improvement
- Provide financial statements at short notice
- Reconstruct accounts from incomplete records
- Clear accounting backlogs and “messy” accounts
- Prepare financial statements to meet statutory deadlines
